

Letters to the Editor

Opinions expressed in letters to the Editor are not those of this paper, and we assume no responsibility for them. Brevity is desired. All letters MUST be bona fide, and signed by the writer, not necessarily for publication. We reserve the right to reject any letter sent in. Opinions of readers are welcomed.

SOLDIER SETTLERS UNION
Editor, The Western Globe.
Dear Sir—The postponed annual meeting of Lacombe Local No. 3 of the Soldier Settlers' Union was held Saturday, Mar. 23, in the Town Hall. It was very much regretted that there was not a bigger turnout, as this was a most important meeting and it is practically impossible for the officers to carry on the urgent business of the settlers without the backing of all settlers. Officers elected were: President, S. H. Hearn; vice-president, H. E. Heath; with W. H. Barker consulting to carry on as secretary pro tem, in addition to his arduous duties as provincial secretary.

H. E. Heath was chosen delegate to the Inter-Provincial Conference in Lloydminster April 3 and 4, provided funds can be raised. It is hoped to pick up a carload of delegates and split the expense.
If the soldier and Empire settlers are so interested in their own welfare, it is impossible for those who are to assist them. Enquiries from many points in the province, many with terrible tales of hardship, are pouring in to the provincial secretary's hands, so let us all get together and work for our own benefit—one case will.

Yours truly,
H. E. HEATH.

Haynes

HAYNES, Mar. 23.—Mr. Jordan, new station agent, has arrived in Haynes to take up his duties and a welcome to the district is extended to Mr. and Mrs. Jordan and family.
Victor Lawton, a popular young man of this district, was married in Red Deer, Mar. 16 to Miss Ethel Simms. Victor was born here and his many friends offered congratulations. On Tuesday evening a number of friends gathered at the home of Mr. and Mrs. Wayne Lawton in celebration of the newlyweds and wish them success and happiness.
The March meeting of the Ladies' Aid was held in the church, with Mrs. MacDonald as hostess.
Born on Mar. 14 at Haynes, to Mr. and Mrs. Johnny Lakeman, a son.

An enjoyable sleigh party of the Karefree Kids visited the home of Mr. and Mrs. A. MacDonald recently, en route having 25 in its sleigh and the sleigh was reported in the journey. Jack Paul's group entertained at this meeting, at which some very interesting contests were held.

CHEESE FACTORY

The first Canadian cheese factory was established in Ontario in 1864 and the first Canadian creamery for butter-making in 1865. The first Canadian cream separator was imported from Denmark in 1882 and the Canadian government's organization of cold storage services dates from 1895.

Around The Town

Miss Jean Henderson is confined to her home through illness.

Mrs. Simpson and Mrs. Cruickshank were joint hostesses to the Ladies' Bridge Club Monday night at the home of the latter, when Mrs. Graham secured the prize.

Alex Watson shipped two cars of horses east this week.

On Saturday next, Clarence Dameron will conduct an auction at the farm of R. D. Farrahman, Rimby.

Happy Wilson is leaving Monday for Calgary to attend the Spring Horse Show.

Mrs. A. Davies is a visitor in Calgary.

Mrs. Mary Cairns of Edmonton is visiting her daughter, Mrs. C. Simpson.

Mr. and Mrs. J. C. Cummins motored down from Edmonton last week-end and were guests of Mr. and Mrs. McCaughy.

Don't forget the Fashion Show next Wednesday.

McKenzie Bros. shipped one car of horses to Toronto and one car to Halifax this week.

The W.M.S. will hold a silver tea, sale of home-made cooking, aprons and other useful articles, at the home of Mrs. W. C. Sweet, on Saturday, March 28.

Mrs. Waters entertained the members of her bridge club at the home of Mrs. C. M. Lavery on Monday evening. Three tables were in play.

The Sayings of Poor Richard

When a Friend deals with a Friend, Let the bargain be clear and well pen'd, That they may continue Friends to the End.

ARMAMENT CORPORATIONS PROFIT FROM WAR SCARES

War threats in Europe, actual war in Africa and border skirmishes with threat of conflict in Mongolia constitute extraordinary sales campaigns for armament corporations in every part of the world. These factories are working 24-hour shifts in an effort to keep pace with the huge demands of governments for increased armaments. Britain is launching a \$1,500,000,000 defence project in the U. S., the figures are close to a billion in France, Poland, Russia and Germany the figure reaches staggering totals. In all countries save Russia, the armament industry is privately owned, Vickers, perhaps the largest manu-

Spruceville

Mrs. Stout is now well enough to be up. Mrs. Powers is looking after her.

Miss Esther King is back again with Mrs. Heath, having fully recovered from her illness in January. Saving has been the order of the week.

The dance at Spruceville last Tuesday was not so well attended as was expected.

Mrs. H. S. Heath has returned to her son's farm after an extended visit with Mrs. Jones of Lacombe.

Mr. and Mrs. Barnes were visitors at the Stephenson home last Sunday. Mr. and Mrs. Bob McGeachy have left the Spruceville district for their new home on the Robert Lindsay farm near Joffre.

Mr. and Mrs. William Barker visited Mr. and Mrs. Gibson in their new home near Bentley last Sunday. Extra feed is the latest the victim and is reported quite sick.

The U.F.A. meeting will be held at the home of Mr. and Mrs. Heath on Tuesday, Mar. 23. Two papers will be given and discussed.

Grain and Livestock Prices

Hogs (Bacon) \$7.40

GETS HER CHANCE

There's a reason for the sparkling mist bestowed upon the world by the Jackson Heights, N.Y. girl. She was adjudged the best of 2,000 amateur models in a contest sponsored by a New York department store. The prize is a screen test which may net Miss Donald a film career and a chance to climb to stardom.

Control Sins and increase yields by treating your farm with New Improved Cresant, a low cost Dust Disinfectant for Wheat, Oats, Barley, Rye and Corn.

The Salvation Army will hold a Sale of Work and Home Cooking in the Oddfellows' Hall on Saturday, March 28, at 3 p.m. Tea will be served. All welcome.

Control Sins and increase yields by treating your farm with New Improved Cresant, a low cost Dust Disinfectant for Wheat, Oats, Barley, Rye and Corn.

Canadian wheat in store for the week ending Feb. 28, 1936, showed a decrease of 12,944,440 bushels compared with the corresponding week of 1935.

Chigwell

Mr. Henry Gimbel has moved to his place, which he recently purchased from Mr. Martin Kish.

Mr. Joe Wood has purchased the Ed. Rowland quarter, north of Prentiss.

Messrs. Hand, Seaville, Watkins and Draper are waiting for the weather to clear, for they all have a pile of wood to saw up.

While Mr. and Mrs. Lester Chiswell and daughter, Dorothy, were visiting Mrs. Chiswell's mother, Mrs. Steave in Edmonton on Mar. 24, the stork paid a visit to Mrs. Lester and left a baby daughter, weighing six pounds.

While visiting her grandmother, Dorothy Chigwell contracted the measles.

Mr. Arthur Olson has rented the Alex Lamb quarter for the coming year.

Roots of Sweet Clover and Alfalfa

The prominent place of the legumes, alfalfa and the clovers in Canadian agriculture, and the frequent occurrence of injury to these crops, followed by the winter dormancy period, have led to an extensive study of the situation by the Dominion Laboratory of Plant Industry at the University of Alberta, Edmonton. After several years' work it has been discovered that several soil-inhabiting fungi, most of which heretofore have not been considered as parasites on these legumes, may alone actually destroy all or part of the root system, or, in conjunction with mechanical factors, freezing injuries common during this period, greatly increase the final damage which occurs immediately following winter. That is to say, the winter injury, or straight parasitic injury, may exist separately or together. When acting together, the injury is greatly increased. Part of the study has involved the testing of the natural resistance of the various varieties to the different fungi parasitizing them, in the hope that some varieties resist better than others, and that these may be used as plant breeding material for the production of new varieties having greater resistance than others we now employ. A reduction of the mortality associated with winter killing by this means would obviously be of great economic importance. However, until such time as these varieties are available, field known to be severely infested with these root-rotting parasites should not be used for alfalfa or the clovers, but for cereals and food crops. If this is done, and only methods employed which will produce strong, vigorous root systems to enter the winter period, the grower will be protecting himself as far as possible against loss which follows the over-wintering period.

Annual Totem Pole Golf Tournament at Jasper Park Lodge

WINNIPEG, Man.—According to an official announcement, the 11th annual Totem Pole golf tournament will be held at Jasper Park Lodge from Sept. 6 to Sept. 12, inclusive, this year. The announcement of these dates will be of much interest to the golfing fraternity of Western Canada and the Pacific Northwest, as

Flu and Measles Prevalent in Lacombe

During the past few weeks, Lacombe has been in the grip of an influenza epidemic and the communicable disease of measles, from which a particularly large number of townpeople and families have suffered. Many homes have had all their occupants laid up with one disease or the other, and little signs of abating at present.

Over 40 cases of measles have been reported, confined mostly to younger children and those of teen age. From a prominent authority, parents and others are advised to exercise extreme caution in treating cases of influenza.

Some towns have been so severely hit that schools have been temporarily closed, but fortunately that has not been necessary here.

VIMY DINNER

The annual dinner sponsored by the Lacombe branch of the Canadian Legion will be held in the Church Hall on the evening of April 9. The usual custom of bringing in an out-of-town speaker is being followed and his name will be announced later.

Indications are that this year's tournament over the popular Jasper course will be the largest in the history of the event.

BOARD OF TRADE TENDERS BANQUET TO C. B. HALPIN

EDITOR FOR 29 YEARS TO RESIDE IN CALGARY.

A very enjoyable banquet was tendered Charles B. Halpin, late owner of The Western Globe, at the Lacombe Board of Trade at the Adelphi Hotel last Friday night, when Dr. E. A. Sharpe, president of the Old Timers' Association, made a pleasing presentation of a purse of gold to Mr. Halpin, who left with his family Saturday to take up his residence in Calgary.

Henry Trane, president, occupied the chair. Over fifty attended the successful affair, comprising many business and professional men of the town and several from the immediate district.

In making the presentation, Dr. Sharpe feelingly said "it was a token of the esteem in which Mr. Halpin was held by the people of the district, and an appreciation of his services to the locality, during the long period of 30 years, and he knew he was voicing the sentiments of all present by wishing him and Mrs. Halpin every success and many more years of happiness, health and prosperity."

Mr. Halpin was visibly affected and thanked the gathering for their kindness. Lacombe would always remain "home" to him, he said, and would look forward to his return when he was serving with the Manitoba Grenadiers of Winnipeg.

He has been in the printing business over 40 years, and has been with C. F. Dameron, Bentley, and Rev. R. B. Layton spoke and eulogized on Mr. Halpin's value to the district, his reputation as a printer, and his service to the community.

Rimby

RIMBY.—No recent cases of scarlet fever have been reported in Rimby and health authorities ordered the reopening of the Rimby schools on Monday. All children attending the village school are receiving free inoculation, provided by order of the board of trustees. Sunday schools, theatres and other community gatherings are again functioning with the release of the ban. Several public dances have been planned for the Spring season.

Adjoining municipal districts of Blindman and Last West, which have been offering a five-cent bounty on magpies during the winter months, report that while the Blindman district has paid out \$12 for that purpose, Last West paid for only one magpie—a sum of five cents. Bounty for crows will be discussed at the next meeting of each council.

Every planned dance are the curlers' ball on Mar. 27 and the Easter ball on April 13, proceeds from the latter to go to the Rimby Hospital.

Charles Owens, a resident of the district for 20 years, is planning a trip to England in April.

AGREEMENT ADDED TO SOCIAL CREDIT BILL BY PREMIER ABERHART

GIVES PROVINCIAL GOVERNMENT AUTHORITY TO INTRODUCE NEW ECONOMIC ORDER WITHOUT REFERENCE TO LEGISLATIVE BODY.

By B. WINDROSS
EDMONTON, Alta. (Press-Gazette).—The Social Credit bill came up for consideration in committee of the whole Friday and was reported for third reading after an important amendment was added to it on motion by Premier Aberhart.

This amendment alters the scope of the bill, or widens its scope so that the bill as it now stands makes it quite possible for the government to introduce and establish Social Credit without recourse to the legislature for approval.

Perhaps this is the most radical and reactionary feature of the measure. It means that for the first time in history a British self-governing province will be clothed with authority to go ahead and establish an entirely new order of the whole affecting every phase of the public life one way or another, without referring its decisions or actions to the legislative body. In other words, it takes the legislative power out of the hands of the legislative body.

It would appear to be the next thing to dictatorship if it doesn't actually give the executive council the powers of a dictator. Opposition speakers pointed out that it was "government by order-in-council."

On the other hand it is argued by government supporters that the action to be taken by the executive following a new order of the whole Social Credit proposals will be what would be supported by the majority in the House in any case, and besides that, the government was elected for the specific purpose of putting Social Credit into operation in Alberta and is therefore justified in taking the shortest way to the objective on the mandate of the people.

Spring Fashion Show

A Fashion Show and Tea will be held in A. M. Campbell's Store on Wednesday and Thursday afternoons, April 1 and 2, at 3 o'clock.

Some of these modeling the new Spring styles will be Misses L. Johnson, B. Burnett, H. Macdonald, J. Henderson, L. Todd, M. Polley and Mrs. L. Calkins. Little folks things will be shown by Pat Robinson, Marjorie Buchanan and Jackie Wilkes.

Tickets will be on sale at Campbell's Store. Tables must be reserved. Tickets, 25c. Under the auspices of the N.W.A. Silk Hose will be given to the lucky ticket holder each day.

SOUTH AFRICAN RAILWAYS HAVE LARGE SURPLUS

CAPETOWN, South Africa.—The government-owned railways of South Africa are in the happy position of having so much surplus of earnings that it is proving somewhat embarrassing. From a heavy deficit a few years ago revenues are reaching unheard-of figures.

For the first seven months of the fiscal year ending Mar. 31, 1936, railway revenue amounted to approximately \$85,125, an increase of \$8,695,125 over the corresponding period for the previous fiscal year. While the revenue figures created a record, the weekly earnings on three consecutive occasions during December broke that record. It is estimated the railways will have a surplus of roughly \$12,500,000 after deducting a special appropriation out of earnings of \$7,500,000.

CANADIAN PACIFIC ANNOUNCES BARGAIN FAIRS TO COAST

Elsewhere in this issue there appears an announcement of bargain fares to the Pacific Coast. Tickets will be on sale April 3 to 11, inclusive, with 21 days return limit, and will permit stop-over at Banff, Nelson and stations west.

From present indications there will be a record travel and those contemplating the trip are advised to get in touch with Mr. Jackson as early as possible.

One-Year-Old Boy Crosses Atlantic Unaccompanied

VANCOUVER, B.C.—Six thousand miles of travel, part of which included a solo jump across the Atlantic on the liner Andania, left only smiles on the chubby face of one-year-old David Ian Bland, who arrived here over Canadian National Railways recently to find a new home in Canada.
Grandson of Sir Arnold Rushton, one-time Lord Mayor of Liverpool, England, David has been adopted by his uncle and aunt, Mr. and Mrs. Gerald Rushton of Vancouver. He crossed the ocean unaccompanied and was a popular passenger. At Halifax he was met by his new mother, with whom he made friends immediately. For 3000 miles across Canada he smiled his way into the hearts of fellow-travellers and train crew and romped home recently easily a winner.
David's new Daddy is an official of the Union Steamship Company, and David adopted the new house flag with a grin that left no doubt about his feelings in the matter.

Automotive World

"MOUNTED" ON MOTORS

They are still "mounted" police, but comparatively few of them now ride the ponies usually associated in the public mind with Canada's scarlet-coated force. What is lost in romance is gained in utility. Sir James Maclellan, commissioner of the Royal Canadian Mounted Police, in Washington recently for a game preservation conference, explained how things are. The men of the famed force have to go in for faster means of transportation than horses now. There are few places where motor-cycles, automobiles, boats or airplanes cannot penetrate, and so the number of constables on horses has now been reduced to about 300, mostly on the furthest frontiers.

"DISCOVERING" KNEE ACTION
Thousands of motorists this winter have discovered the full benefits of the "knee-action ride" for the first time. These drivers are those who rarely if ever drive off pavement. Their driving is limited to city street or smooth paved highway. But the cold winter, which has seen rats and bumps of ice and snow forced on all heavily travelled roads, has demonstrated the advantages of knee-action wheels, which move up and down independently of each other and sink up shocks through big coil springs.

"Knee-action" definitely gives an improved ride on even the smoothest streets," a General Motors engineer points out. This has been proved to motorists all over the world who have driven a car with knee action and one without over the same route under the same conditions and compared the comfort. But the rougher the road the more noticeable this difference is. And the cold winter, producing bumps of ice and snow on even the smoothest

highways, has accentuated the difference between the ride in a knee-action car and the car without this improvement.

SIX MILLION SIXES
Twice since Chevrolet introduced its six-cylinder models, it has had a million-car year. One of these was 1935; the other, the introductory year, 1929. Off the assembly lines last month rolled Chevrolet's six millionth Six. That's a million more than all the Chevrolets which were built before the Six came along. Honor of driving the six millionth Chevrolet Six goes to Mrs. J. F. Boden of Detroit, who got it for a wedding present.

Chevrolet Six has changed considerably since 1929, and today's cars, despite their vastly improved performance powers, are more economical to operate than were the first sixes. Although they are larger, heavier, and of course wonderfully improved in appearance, prices are lower than those of the first Chevrolet Sixes.
Provinces west of the Great Lakes registered some impressive increases in motor car statistics now available for the whole of 1935. Registrations serve to illustrate. The Dominion as a whole chalked up a gain of 4 per cent in registrations of passenger cars and commercial vehicles, while the gain in the three most westerly provinces averaged considerably higher than that. British Columbia having an increase of 5.3 per cent. Saskatchewan had the biggest gain of all the provinces for passenger cars sold during the year, an increase of 59.4 per cent over 1934. Saskatchewan also led in bus and truck increase, with British Columbia and Manitoba following closely.

A Guy With Guts

Canadian immigration authorities claim that this country only wants newcomers—preferably farmers—who have capital. But a new novel will appear this month—"Go West, Young Man," which is good evidence to the contrary.

What we want in Canada are newcomers with GUTS. That was all the capital Bernard J. Farrer had when he came out to Canada to invest it, a few years ago. This moving and exciting novel is one of the results.

For part of a construction crane fell and crushed his shoulder while he was working on a gang erecting a Keweenaw power plant. At the hospital, and months with a useless left arm—a knockout blow for a young fellow without friends or connections, whose only chance of work seemed rough and heavy jobs.
But this young man was rich—in GUTS. There is one job you can do with a single arm—writing. So Bernard Farrer wrote a short story—many of them—a job as strange and difficult for this young Englishman as laying railway ties as a section hand, or pick and shovel work on a construction gang.
He often had to go without food to buy stamps, and rejection slips flowed back unceasingly, but he kept on trying. At last he held one. He says it was a thrill comparable to selling the first pair of silk stockings when he had his only "soft" job—house to house canvassing.
The story brought in more money than the silk stockings, but not much. He put aside most of it for more stamps, and lived or starved on the rest. Ten cents a day was his housekeeping budget. He bought stale bread and ate it dry, because he had heard that drinking water might make it—and him—sweat dangerously.

Still no more sales! On the brink of actual starvation he got a job on the track gang near Hearst, and left Winnipeg for good.
An unbiased Canadian observer would say that this young man had "rotten luck" in Winnipeg. He had turned his hand to any honest jobs that offered and slaved at them, his shy independence had prevented him from asking or receiving favors, or making a single friend outside the ranks of "floaters" like himself, he had been injured, and got the legal compensation only with difficulty, he had nearly starved. Yet—where this partly biographical novel, "Go West, Young Man," deals with Winnipeg, there is not the ghost of a whine! It was tough—but all in the game!

After several more jobs as hard as the track laying—and there are none tougher than laying ties in the Northern Ontario mosquito season, he landed at Timmins and got his first tolerable job, as a sampler in the Hollinger mine. Readers who like to know how Canada earns its bread will find no more moving or thrilling stuff than the chapters on the great fire in the Hollinger mine. But every moment of his spare time was spent writing more stories, and having them rejected! He went to Toronto, where McLean's Magazine bought two stories. Other occasional sales turned up—enough to buy stale bread and postage stamps, not always enough for room rent. So he came to Montreal and worked on the shore gang for the Canadian National Steamships, cleaning and renovating boilers deep in the engine rooms of hawsered steamers where summer temperatures run to 140 degrees Fahrenheit.

But he went on writing, and wisely, of things he had come to know—of engine rooms. "Jed Morrow's Bride," a story of a sea-going engineer, was one of them, and with it he won the \$200 second prize in a

MacLean's short story competition. It brought him a breathing space and a chance to start his novel, "Go West, Young Man," which, after many re-writings, was bought by a famous British publishing house, as all his short stories had been bought, as all his jobs had been obtained—Colombia having an increase of 5.3 per cent. Saskatchewan had the biggest gain of all the provinces for passenger cars sold during the year, an increase of 59.4 per cent over 1934. Saskatchewan also led in bus and truck increase, with British Columbia and Manitoba following closely.

SEED POLICY PLUS PUBLICITY REQUIRED
As a result of the early frost last season, there are areas in this province where good seed for next spring's planting will be scarce. Fortunately for this district, wheat was spared extensive damage. Grain authorities express the belief that there is ample good seed right on the farms for the season's requirements.
But the situation is not so satisfactory in respect to oats. This section of the province, in common with many other parts of Alberta, will be short of seed oats testing reasonably well for germination. There is the probability that some difficulty will be experienced in providing sufficient seed oats to fill the demand.

A plan has been sponsored by the Dominion and provincial departments of agriculture in co-operation with the Canadian Seed Growers' Association, whereby commercial grain may be exchanged for certified seed. This plan provides a means of securing good seed of certified purity and of known germination. Grain growers are being advised to consult their local elevator operators for particulars, and it is further announced that "no applications can be received after March 1."

In view of the severity of the weather, which has been almost continuous since the first of the year, there has been little opportunity for the average farmer to see his local elevator man, even for the purpose of marketing the remnants of his '35 crop. In the face of this, an extension of the time for making applications for certified seed under this "exchange" plan would seem to be a good business. There is a very noticeable lack of understanding of this seed distribution plan among

GARDEN CLUB IS FORMED AT BENTLEY
BENTLEY—About fourteen ladies and gentlemen were present at a meeting held at the club rooms on Saturday evening last for the purpose of organizing a Garden Club. On account of Mrs. C. F. Dameron, who had called the meeting, being absent on account of illness, Mrs. W. Whitesell gave a short outline of some of the suggestions Mrs. Dameron had planned to bring forward for discussion. The vote to form a club was unanimous. Mrs. Dameron was chosen president.
Considerable discussion took place but as it was known that many who had intended to attend were prevented owing to the state of the roads, no further action was taken and a meeting was called at the club rooms on Saturday, Mar. 21, at 2:30 p.m., when it is hoped there will be a larger attendance and the organization will be completed. Anyone interested in any phase of horticulture, either resident of the village or country adjacent, are cordially invited to attend.

Production Cost Of Weanling Pig

"How much does it cost to produce a weanling pig?" This question is asked of the Dominion Experiment Station, Lacombe, scores of times each year. Fortunately, the Lacombe Station is in a position to give a definite answer, as experiments carried on for years have unearthed a wealth of information on this important question.
The result of these experiments show that approximately one ton of chop for each 12-month period is required to carry a sow raising one litter a year, while 2500 pounds of chop will carry a sow raising two litters a year for the same period. These figures also cover the feed consumed by the young before weaning.

At present, most good grain mixtures for swine are worth about three-quarters of a cent per pound. At this charge it would cost approximately \$15 to feed a one-litter sow for a year; adding this to the overhead charges of \$16, the cost to produce one litter is \$31; or, for an average litter of seven, \$3.77 per pig. The cost of grain for a two-litter-a-year sow is \$18.75 and the overhead \$13.33, making a total of \$32.08, which, for a total of 14 pigs, makes the cost per pig \$2.29.

In other words, with the same conditions under which one litter per year is produced, it is possible to produce two litters for \$2.08, so that the second litter from a two-litter-a-year sow actually costs only \$2.08, or \$1.41 a pig.

There is still another plan—breeding for three litters every two years. The total feed cost for a sow under this plan is \$33.75 for two years and the two-year overhead \$23.33, giving a total cost of \$57.08 for 21 pigs. In this case, cost of each pig is \$2.72. As many pigs will not regularly produce two satisfactory litters a

year, the grain growing areas are to be warned against inferior seed of low germination, very prompt action should be taken by the provincial department of agriculture, to the end that adequate printed publicity be distributed. The effect of such publicity, or the lack of it, may be very noticeable when the results of next spring's seedling become apparent.—Hanna Herald.

SEED POLICY PLUS PUBLICITY REQUIRED
As a result of the early frost last season, there are areas in this province where good seed for next spring's planting will be scarce. Fortunately for this district, wheat was spared extensive damage. Grain authorities express the belief that there is ample good seed right on the farms for the season's requirements.
But the situation is not so satisfactory in respect to oats. This section of the province, in common with many other parts of Alberta, will be short of seed oats testing reasonably well for germination. There is the probability that some difficulty will be experienced in providing sufficient seed oats to fill the demand.

A plan has been sponsored by the Dominion and provincial departments of agriculture in co-operation with the Canadian Seed Growers' Association, whereby commercial grain may be exchanged for certified seed. This plan provides a means of securing good seed of certified purity and of known germination. Grain growers are being advised to consult their local elevator operators for particulars, and it is further announced that "no applications can be received after March 1."

Census Officials Are Appointed By Hon. W. D. Euler

The Honorable Mr. W. D. Euler, Minister of Trade and Commerce, has announced the appointment of the following Census Commissioners for Alberta, in connection with the census of the prairie provinces, to be taken on June 1, 1936.
The appointment of census commissioners, who will conduct the house-to-house and farm-to-farm canvass, is made on recommendation by these officers:
Acadia, Fred W. Baynon, Esther, Alta.; Athabaska, D. A. Stack, St. Paul, Alta.;
Battle River, J. A. MacKenzie, Wainwright, Alta.; Bow River, Jas. E. Herron, Calgary, Alta.;
Calgary East, F. S. Jacobs, De Winton, Alta.; Calgary West, R. L. Nicholson, Calgary; Camrose, L. J. Shepard, Alliance.
Edmonton East, N. Campbell, Edmonton; Edmonton West, M. M. McKim, Edmonton.
Jasper-Edson, Geo. Bryan, Stony Plain; Lethbridge, C. A. Wood, Lethbridge; Medicine Hat, Walter D. Gow, Medicine Hat; North Fork, Medicine Hat, Walter D. Gow, Medicine Hat; Peace River, Harley H. Conrad, Claumont.
Red Deer, A. Clark Bury, Olds; Vegreville, A. L. Horton, Vegreville; Wetaskiwin, A. P. Mitchell, Millet.

Production Cost Of Weanling Pig
"How much does it cost to produce a weanling pig?" This question is asked of the Dominion Experiment Station, Lacombe, scores of times each year. Fortunately, the Lacombe Station is in a position to give a definite answer, as experiments carried on for years have unearthed a wealth of information on this important question.
The result of these experiments show that approximately one ton of chop for each 12-month period is required to carry a sow raising one litter a year, while 2500 pounds of chop will carry a sow raising two litters a year for the same period. LIVESTOCK STATISTICS
According to the annual report on farm values for 1935, there were 2,931,337 horses in Canada during that year; 3,849,200 milk cows; 4,841,400 other cattle—total cattle, 8,690,600; sheep, 3,399,100; and swine, 3,549,200. Although the number of animals was less than in 1934, the value was considerably greater, showing an increase of 18 per cent, or a total of \$75,000,000.

Strain Of Reward Wheat Accepted As Basis For Registered Seed Stocks

Since the naming of Reward wheat some fourteen years ago, its originators have made extensive studies of hundreds of selections with the hope of finding one which would produce more satisfactory yields than the original variety. A few Dominion Experimental Farms and private growers also have been carrying on a certain amount of selection work with the same objective.

During the past four years the best eight of these selections have been subjected to comprehensive tests at the Central Experimental Farm, Ottawa, the University of Alberta and the Dominion Experimental Stations at Swift Current, Scott, Lacombe and Beaverlodge. Extensive quality tests have also been made of the flour from each strain. As a result of these studies it has been found that while all eight strains are somewhat superior in yielding ability and equal in quality to the original more or less composite variety yet there is no real difference between the strains themselves. Since, however, one of these strains designated Reward 22-42, has been grown fairly widely in recent years and since it has proven to be as good as any it has been decided to accept this strain as the basis for future registered seed stocks for the variety.

A special block of this strain at the Dominion Experimental Station at Lacombe, Alberta, and another at the Central Experimental Farm, Ottawa, passed field inspection for registration as Elite Stock Seed during the past summer while samples from each block sown in the so-called "verification tests" also proved to be up to the required standard. The Canadian Seed Growers' Association therefore has decided to accept these stocks as Elite Stock Seed on the condition that the resulting crops in 1936 meet established requirements.

As a variety Reward has proven fairly satisfactory in many sections throughout the Prairie Provinces although disappointing in others. Its quality is universally accepted but its returns in bushels per acre have not always been what one would like.

The behaviour of this variety throughout the area seriously affected by rust in 1935 has won for it many friends as it gave a crop in many areas where neither Marquis nor Ceres was worth cutting.

The Elite Stock Seed of Reward 22-42 will be increased as rapidly as possible chiefly by members of the Canadian Seed Growers' Association. —J. G. C. Fraser, Central Experimental Farm, Ottawa, Canada.

A Wrong Viewpoint

World Not Getting Worse As So Many Think

Charles M. Schwab, at the age of 74, says that this is a pretty good world, after all, and is getting better all the time.

And by may be right.

When one takes a long view of man's upward climb from the primordial ooze, the probability that he is right appears all the greater.

While the world still has its wars and rumors of war, while fear and hatred and intolerance have not yet been driven from it, while crime is rampant, and the moral and ethical pendulums swing low, there is ground for hope, if one remembers that the course of human progress has never been steady, that ultimately even those ugly things will be measurably controlled.

The feeling which each generation has that the world is going to the dogs comes of its taking too short a view of human history.—Detroit Free Press.

Has Made Many Contacts

King Edward Knows Problems That Confront His People

Philip Guedella in an article in the Spectator about King Edward says: A modern king with a far wider range of contacts than any of his subjects and a complete awareness of their real occupations and the problems which confront their country; a sharp questioner and a shrewd listener of wide experience; a busy mind that finds its own solutions and prefers to say the things that it has thought of for itself; a man of innumerable and diverse friendships; and the last man in England to desire to hear smooth things on serious affairs.

Easy To Identify

"Have you seen that gorgeous dress in Wholesale's window? It's a sort of sunny color. Almost purple but with a little pink in it and a bluish tinge. You'd wouldn't exactly call it mauve. It has little jiggers all round the skirt that loop up with a little silver whorl on one side and has a long flowy thing on the shoulder and little whatnots on the end and a sort of a pinky yellow splash at the waist."

"Oh, you mean the one with the green what-you-may-call-em on it?"

"Yes, that's it!"—The Humorist.

Uncle Sam's forest service crews fight an average of 28 fires daily during the summer months.

Einstein Has New Theory

Is Later Explanation Of The Origin Of Matter

Quantization and electricity combine to form solid matter, Professor Albert Einstein declared in an 11,000-word article designed to put "reality" into the great mysteries of the science of physics.

"Free invention" of explanations of these mysteries, he held, is the only logical system to arrive at the long sought truth.

His explanation of the origin of matter is a development of his theory of electrical bridges between shells of space announced about a year ago, and he traces man's attempts to solve riddles of matter and gravitation since the Greeks.

Lately "causality," or cause and effect, have seemed about to disappear in the wonderland of the atomic world of physics. But Einstein in this article says that by observation of realities, coupled with daring imagination, physicists will find logical solutions.

As one example he sketches the troubles raised by quantum mechanics, the most brilliant of recent physical discoveries. Quantum mechanics show, and experiments have proven, that energy is not continuous, but somehow made of particles. But, he says, no one has shown how the steps between these particles of energy are made—for example, when a hot iron cools, the heat is given off in particles, or steps, and no one knows what happens in the steps.

He cited the Schrodinger mathematics as explaining that these steps do actually occur, by statistics which make any idea of what the individual steps may be.

Einstein then proposes his explanation. He uses the relativity theory to account for the theory of corpuses of matter, which he originally announced with Rosen of Princeton.

The mathematical solutions, he says, show physical space as consisting of two identical sheets connected by a bridge. This bridge is a corpuscle, a material particle, something made of electricity and gravitation. The mathematics he states solves correctly for one "bridge" or single neutral particle, that is, with no electrical charge. But not yet for "several bridges," something necessary to account for the complexities of matter.

Thought He Was Boasting

Brakeman Calling Station Taken To Task By Irishman

There is a small island on the west coast of Scotland named Iona, and Highland parents often call one of their daughters after this historic island. There is a station on the Michigan Central Railway in Southern Ontario named Iona. There was a well-to-do old Irish farmer on the train one day when the brakeman went through the train calling out: "Iona Station; Iona Station!" When he passed the son of Erin shouting "Iona Station!" the Irishman could no longer stand the brakeman's boasting, as he thought, and indignantly said: "Bad cess to yer ignorance, young man. Why tell all the passengers ye own a bit of a station."

His own 400 acres of the big land in Elgin County and nobody ever heard me blowing about what I own."

Predicts New Treatment

Professor Believes Total Deafness Will Be Overcome

Prof. George W. Stewart, head of the University of Iowa physics department, predicted science would develop a treatment for deafness in which the skins of the back or abdomen will be made to serve as "ears." Basing his prediction on recent developments in sound amplification and the fact totally deaf persons could "feel" the rhythm of music, the physicist said, "by amplifying sounds and increasing the area of stimulation on the human body, something better than stone deafness should be realized by persons whose ears now are totally useless."

Effective Police Club

Delivering an electrical current powerful enough to help disperse rioting crowds, a new police club is available for law-enforcing officers. It is made of bakelite with six metal rings at one end. If a rioter comes in contact with the rings while the policeman presses a button on the handle he receives a violent jolt. A small high-tension vibrator coil and small flashlight batteries produce the shock.—Popular Mechanics.

The back-sawyers, common bugs of our lakes and ponds, swim upside down. They lie on their backs, and use their legs for oars.

Light from a cloudy sky is equal to a brightness of 225 candlepower to the square foot.

The average human thigh bone can support a weight of 1½ tons without breaking.

Spring Versus Fall Ploughing

Former Has Proved Better For Wheat Under Certain Conditions

Some ten years ago, most of the farmers located on loam or sandy loam soils in northwestern Saskatchewan endeavored to do as much fall ploughing as time would permit. This form of tillage was considered good practice both from the standpoint of weed control and distribution of work. In recent years, however, the amount of ploughing done in the fall has rapidly decreased.

An experiment has been in operation at the Dominion Experimental Station, Scott, for the past twenty-one years, to test the value of spring versus fall ploughing for wheat. The test was conducted on duplicate one-fourth plots. Results show that spring ploughing has outyielded fall ploughing by two and one-half bushels per acre for that period. While the yield difference was not great, it is significant that wheat on spring ploughing returned higher yields in seventeen out of the twenty-one years.

Since there is usually more ploughing done in autumn of over average precipitation, the yields have been studied in relation to the previous fall moisture. In nine out of the twenty-one years, the fall precipitation was considerably over the average but only twice during these nine years did fall ploughing outyield spring ploughing. The other two years that fall ploughing returned higher yields was following average fall precipitation. It has been observed that fall ploughed land was usually drier at the time of seeding than spring ploughing. Even though the soil may be quite lumpy at the time of ploughing it does not hold the snow as well as stubble. Furthermore, the lumps usually are broken down in the spring, thus making fall ploughed land more susceptible to drifting than spring ploughing—a highly important consideration.

Results of this experiment indicate that spring ploughing is more profitable than ploughing in the fall, under soil and moisture conditions similar to those prevailing at Scott, provided that the work can be economically performed at that time. On heavy clay lands, double discing stubble has given better results than ploughing either in the fall or in the spring.

Blind Minister Runs Farm

Carries On With Two Jobs In Spite Of Handicap

The Rev. Richard Lucas is blind but a trojan for work. A farmer, a minister, a dairyman—all the Rev. Lucas manages his mother's farm and fulfills his duties as a minister, despite a handicap. The crops on his farm near Plymouth, North Car., last year amounted to \$4,000.

Up at 3:30 every morning to milk the cows, he lives strenuously the seven days of every week with only five hours allotted for sleep.

After the chores of the day of farming are over the minister prepares his sermons and speeches and reads. He uses the Braille system. Losing his sight while a junior in medical school, and he refused to accept blindness as a handicap. He was ordained a minister and filled a pulpit for many years.

Then came the depression. The minister's mother called him to help put the family farm once more on a paying basis, and he said: "The only thing I wish for is this," he said, discussing his strenuous life, "more sleep."

Made Smugglers Of Hens

German Farmers Had Ingenious Scheme To Avoid Duty

Eight German farmers of Rothenbach, on the Dutch frontier, have been sentenced to five months' imprisonment for making smugglers of their hens, says the London Times. The farmers, whose hens lay on both sides of the frontier, conceived the idea of feeding their hens in Holland, where fodder is cheaper than in Germany, and then driving them over the German frontier to lay their eggs in Germany, where eggs are dearer than in Holland. This ingenious means of making the best of both countries was at last discovered by the customs authorities, but not before 2,000,000 eggs, according to the authorities' estimate, had been carried into Germany without payment of import duty.

Canada's Clay Resources

Development Is Being Encouraged By Department Of Mines

In endeavor to encourage the development of the Dominion's clay resources, the Federal Department of Mines maintains excellently equipped ceramic laboratories at Ottawa. Subjects of general interest to groups of manufacturers are investigated in detail, and technical advice and assistance in minor projects are freely given to individual manufacturers. The objects constantly being worked for are the improving and cheapening of processes of manufacture, the aiding of the ceramic industry to produce better and wider ranges of ware.

There are over 55,000 black or brown bears, and over 5,100 grizzlies in the natural forests of the United States and Canada.

The SNAPSHOT GUIDE

Are You Getting Smudgy Pictures?

Fascinating winter scenes of all types can be snapped with inexpensive cameras. Don't let the winter stop you.

There are in this world many amateur photographers who simply do not give their camera a "break." They complain of smudgy looking pictures and sometimes believe something is radically wrong with the camera. The exposures are correct and developing shows the pictures are fresh, clean chemicals but still, they say, the final results are smudgy looking prints.

You have looked through dirty eye-glasses with probably a few finger prints on them. If you haven't, it's a sure bet that you have experienced the difficulty of looking through a smudgy window. Clean eye-glasses and clean windows give clear vision and similarly the camera cannot "see" so well if its eye (the lens) is cloudy and smudged from grease finger prints and dust collected over a period of months. Cleaning a lens is a very simple operation. All you need is a soft, unperfumed lens cleaner and a clean, starched linen handkerchief and perhaps a match or pencil, if the lens is quite small. The rear surface of the lens can easily be reached by removing the back of the camera. If the camera has a double lens (one behind and one in front of the shutter diaphragm), the front combination may be removed by turning to the left, which will allow you to work through the shutter opening when the lens is in its "up" position. The handkerchief over the end of the match or pencil. If the lens is quite dirty and the camera has a double lens, you will be replacing the front lens, to screw it back into the shutter as far as it will go.

The suggestion to work through

the shutter opening also applies to cleaning the front surface of single lenses fitted to box cameras and certain folding models. Handle the lens carefully and don't exert too much pressure. It isn't necessary to scratch the surface.

The amount of pleasure you get out of your camera depends almost entirely on how much thought and care you give it.

Picture taking is just like golf, tennis, basketball or bowling—the more you experiment, the more thought you give to your hobby, the greater your reward in self satisfaction. There are many good books available on amateur photography but one of the latest of the press is called "How To Make Good Pictures." It is packed with sound advice for the beginner or the advanced amateur and profusely illustrated with pictures of every type diagrams and what have you. It might be called "The Amateur Photographer's Reference Book," but don't think for a minute it is as "dry" as such a name might imply. You can no doubt purchase this book from stores that sell cameras and photographic supplies or secure it in your public library.

Remember that your camera is a precision instrument and should be treated as such. Know your camera—its limitations or its versatility—be careful thought to composition and, story-telling possibilities and you will be well along the way to take the kind of pictures of which you will be proud.

In the lens in your camera, fellow Guild member, clean?

JOHN VAN GUILDER.

Married Life In Rhodesia

Native Women Rule House And Men Hardly Noticed

Marriage has a father-in-law problem as well as a mother-in-law problem among the natives of north-east Rhodesia. Miss Audrey I. Richards, the anthropologist, lecturing at the Horniman Museum, Forest Hill, England, said that a man of the Bemba tribe, when he marries, must go and live with his wife's parents, and also work for his father-in-law. "In this tribe it is the wife and her mother who rule the house and not the husband, of whom little notice is taken," she said. Miss Richards said there was a belief that the children were inhabited by the spirits of their dead ancestors. When a child was born, the parents divined which ancestor had come to dwell in him by rubbing an axe-head on a skin while names of ancestors were called aloud.

Radio Weather Maps

Four Liners Reported Clear Reception Of New Service

Reports received from four liners on the Atlantic stated reception of complete weather maps by radio facsimile had been successful, according to Charles Pannell, president of the Radiomarine Corporation of America, which has just started the new safety-at-sea service. The maps, showing winds and barometric pressures over the entire North Atlantic area, are prepared by the United States weather bureau and were transmitted daily to the liners on which the necessary extra equipment recently was installed. It is planned to equip all passenger ships with the receiving apparatus.

The new service, it was said, would aid materially in reducing uncertainty about the kind of weather ahead of ships.

Loan Board Made Profit

The Canadian farm loan board made a profit of \$59,392 for the fiscal year ended March 31, 1935, according to a statement recently filed in the House of Commons. Accounts for the present fiscal year have not been closed, so figures are not available.

Knit Bot A Coat For Spring

Household Hints by Alice Brooks

You'll Find the Mark Goes Quickly

PATTERN 5545

Too adorable for words!—a youthful coat and matching beret in which to turn your Youngest out in style this spring. Quickly knitted in sport yarn, the coat is mainly just plain knitting with yoke and cuffs in a contrasting striped effect—a simple combination of knitting and purling. The natty beret employs the same striped effect, with wool pom-pom for finishing. Any lot, aged four-to-eight can do both in a jiffy.

In pattern 5545 you will find complete instructions for a knitted coat and beret; illustrations of them and of all stitches needed; material requirements. Directions for sizes 4, 6 and 8 are all given in one pattern. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks newspaper book published

Wheat Grown In Fertilized Air Has Been Interesting Experiment At Washington

What Parliamentarians Eat

Chicken Pie Is One Favorite Dish Of Members

Members of the House of Commons at Ottawa are definitely taking care of figures these days, passing budgets downstairs and passing up potatoes and pastry in the parliamentary restaurant. "They don't eat anything like the amount of starches they used to," Chef Rochon will tell you. Even so, they don't do badly.

Four hundred rolls and 30 loaves of bread disappear daily in the restaurant that seats 204 and serves about 400 meals a day. Fifteen bags of potatoes are peeled every week and 15 gallons of mayonnaise are made in the kitchen by machines. The peeler rubs off potato skins in an almost human way and the mixer stands high as a man.

The favorite parliamentary dish is chicken pie and the second on the list mixed grill. Sweets have varied off the menu of many members but Henri Levesque, who has charge of the restaurant, says all the finicky dieting went out a couple of years ago and most of the men eat an average balanced menu.

All catering for the House of Commons is done in the restaurant by a staff of 42, increased in emergencies to 62, who pride themselves on having carried food four floors down for King Edward when he was Prince of Wales and serving it piping hot.

Industry Not Menaced

Saskatchewan Can Mine Glauber Salts Cheaper Than In U.S.

Glauber salt discoveries in North Dakota are not considered a serious challenge to the considerable industry that has been built up in Saskatchewan, according to mining engineers employed by the provincial department of natural resources. The Dakota discoveries of last summer have been investigated to some extent by the engineers.

Saskatchewan plants sold 65,000 tons of the salt in 1934 and the figures for the last calendar year have not been compiled. Practically all of the Saskatchewan product is sold to paper mills in eastern Canada. The larger market in the United States has been lost to the industry.

The combined deposits of Glauber salt in Canada are estimated at 20,000,000 tons. In a district south of Swift Current, Sask., one deposit is known to contain more than 25,000,000 tons. Mining engineers believe the claim the Dakota deposits will not threaten the Saskatchewan industry on this. The Saskatchewan deposits are concentrated and the salt is found in layers 12 feet thick, while in Montana they are spread out and the deposit is thin. In other words, the Saskatchewan salt can be mined cheaper and, in addition, is said to be of higher quality.

Will Now Admit Women

Lady Senators And Secretaries Served By Senate Barber

The Senate barber parlor in Ottawa has lifted the ban on women. For years the Senate barber, a skilled technician who had cropped crowned heads and shaved princely whiskers, was prohibited from trimming up boyish bobs, or putting the waves in place when they got too wild. A woman reporter crashed the parlor, but was refused, and she revenged herself by revealing alleged secrets of mud baths and other beauty treatments with which the senators were presumed to grapple back their fading manly beauty. But it was all good clean fun, the Senate barber parlor being only a barber shop.

With the advent of Senator Cairine Wilson, and recently of Senator Iva Fails, the barber's bars are down and woman may now patronize the Senate barber shop. The women senators or the women secretaries may now get a brush up and a trim even though a score of senators sit on the waiting bench and fume.

Himalayas Are Safer

Woman Mountain Climber Prefers Them To Ice Street

Dr. Jill Cossey-Batt, O.B.E., D.S.C., who climbed the Himalayan mountains with her husband, Dr. Irvin Baird, F.R.G.S., in 1933, has decided there are more dangerous enterprises than mountain climbing. She slipped on the icy pavement in Vancouver fracturing an ankle and was forced to appear in a wheel chair when she addressed a meeting and told of her experiences on the icy, wind-swept roof of Asala.

China, most populous nation in the world, has 481,821,000 inhabitants in 1930, or 110.4 persons for each square mile of land area.

Two million tons of refuse are collected annually by London's corporations.

People who have cold baths in winter never have colds. But they have cold baths.

A rather new kind of farming—with fertilizer applied to the atmosphere instead of the soil—has been tried on a miniature scale at the Smithsonian Institute, Washington, with marked success. Wheat plants were grown by Dr. Earl S. Johnston of the division of radiation and organisms in atmosphere containing about four times the amount of carbon dioxide found in normal air.

It is from carbon dioxide taken out of the atmosphere and water that plants, through the process of photo-synthesis which takes place in light, build up their substance. On clear summer days sunlight is intense enough to increase the rate of photo-synthesis. This process not retarded by the limited amount of carbon dioxide available in normal air. In an atmosphere enriched with carbon dioxide, Dr. Johnston reports, the weight of straw, the number and weight of heads, and the number of grains were increased in comparison with plants grown in ordinary air.

The Smithsonian wheat fields were only four square feet in area. They were enclosed on four sides with glass, leaving the tops open. Within this glass enclosure, around the growing plants, a fairly constant stream of carbon dioxide was kept up.

Although there have been some attempts at aerial fertilization in Europe, the results have been uncertain and the practice is practically unknown in this country. As Dr. Johnston says in his report:

"The practical application of this type of fertilization in field experiments and the supply of carbon dioxide in sufficient amounts for practical field work are still unsolved problems, in spite of the work that has been done. While experiments in which carbon dioxide is used as an aerial fertilizer are of importance scientifically, the practical application of this type of fertilizer in commercial agriculture is satisfactory, although its application to greenhouse culture appears to be most promising."

Because of the problem of confining the gas over large areas in open fields, he points out, there is at present little practical application of his results to open-air farming.

Solved Problem Herself

Teacher Could Not Be Dismissed But Quits At 75

Mrs. Doris Eper, a teacher in public school, 78, Pleasant avenue and East 119th street, New York, has resigned from the school system, thereby solving a problem which had puzzled school officials since 1924, when she reached the compulsory retirement age of 70. Mrs. Eper was the only teacher in the system who had not joined the Teachers' Retirement System. The pension board, therefore, was powerless to force her retirement at the compulsory age.

Mrs. Eper was appointed as a teacher on November 1, 1888. She resigned in 1908 but returned to the pension system then, a privilege she was entitled to during her first three years in the system. At the end of the three-year period, however, the pension board allowed her to waive membership in its ranks, although the board later conceded the action was illegal.

In 1929 all teachers were required to join the retirement system. Mrs. Eper was 72 years old at that time, or two years older than the retirement age, and the pension board would not accept her. Thus she could have continued teaching as long as she wanted to, but educational laws do not permit the dismissal of a teacher solely because of age.

Would Reduce Expense

Device Re-inks Typewriter Ribbon And Prolongs Its Use

Any business man whose office force uses a large number of typewriters well knows the appreciable expense made necessary by the constant purchase of new typewriter ribbons. In the past, number of devices have been developed using various kinds of solvents to renew the brightness of color in old ribbons and thus prolong their life.

A new device consist of a small solvent container molded of Bakelite, through a side slot of which the typewriter ribbon may be passed white on the main drive. It is only necessary to hold the device in position and wind the ribbons through from one end to the other once a week. It is claimed that such an application of the solvent will keep the ribbon in a soft and pliable condition, always ready to turn out sharp, bright, full color work.—Scientific American.

Good News For Ladies

Massachusetts would chivalrously refrain from asking women voters their exact ages under the terms of a bill proposed by state Representative John Wenzler. Wenzler said "it should be sufficient for women to say they are 21. It is just one of their peculiarities to which they have a right."

Growing Flax In Central Alberta

A very early variety of flax should be used in Central Alberta. The sorts which have been proven both earliest and highest yielding at the Dominion Experimental Station, Lacombe, are (in order of merit), Red Wing, Prince and Bison. All of these are good varieties; however, as seed of the first two sorts is rather scarce, it may be necessary to use Bison. As Bison is a larger-seeded variety than the others, weed seeds may be more easily cleaned out of it.

Flax is not as quick on the get-away as some of our weeds, and cannot compete with them. To ensure a crop it is always wise to seed it on reasonably clean land—preferably summer-fallow.

At the Lacombe Station this crop is seeded at the rate of two pecks per acre, between the first and the tenth of May. It is not as susceptible to Spring frost injury as is generally believed, and in the last 15 years the crop at Lacombe has been frozen only twice in the spring.

An old practice was to seed flax on land which had just been broken, and it was found that this land would seldom produce a good crop for the next year or two, which gave rise to the belief that flax is hard on the land. However, this belief has no sound basis; it was the cultural method, not the crop, that was at fault. Experience has shown that it does not pay to sow flax—or any other crop—on land which has been broken when the weather is Spring. Flax is actually no harder on the land than any other cereal.

The Lacombe Station recommends that flax be seeded alone, and not in any mixture.

Flax seed may be secured from the seed houses in all the Western cities.

NOTICE

Anyone having claims against C. B. Halpin, former proprietor of The Western Globe, is requested to file particulars of the same with the undersigned in order that provision may be made for their payment.

J. S. McCORMICK, a2c

Does Beekeeping Pay In the North?

Successful beekeeping in the North on commercial lines will depend on the amount of nectar available as well as on the experience of the operator. Sweet clover makes ideal bee pasture and is well adapted as a forage crop and soil improver. Cropping plans should include the sowing of a considerable-sized patch near the apiary. Fireweed, when present, is a productive but irregular source of fine honey. Wintering, either outdoors or in cellars, is not more difficult than in other areas where beekeeping is well established.

As a sideline on a small scale, the experience of the Dominion Experimental Sub-Station at Beaverlodge, Alta., would suggest that half a dozen or more colonies would produce over a period of years sufficient returns to cover the investment and allow reasonable returns for the work involved.

The novice will profit from the

experience of successful operators. It is suggested that he start with one colony or one or two packages. From these he can increase his apiary by division or purchase, as he is inclined. Some advocate the destruction of the bees in autumn but the majority are inclined to carry their bees through the winter, especially if a suitable cellar is available.

Bulletins on beekeeping are available from the Publicity and Extension Branch of the Dominion Department of Agriculture, Ottawa. Those interested may receive Apiary Reminders monthly from their nearest Experimental Station.

KING EDWARD VISITS GLASGOW

An incident of the recent inspection of Britain's new super-liner, Queen Mary, now nearing completion at Clydebank, Scotland, by King Edward VIII, is pictured. Cheers for "Tiddy" were raised by the ship workers when their monarch visited them without formality, used the greasy smudges that the laborers use, in boarding and leaving the ship, and commended them for the excellent job they are making of this newest and greatest unit of the British merchant marine. Later he visited dwellings of the workmen nearby and commented on the quality of some of them, as compared with the luxury that is being built into the new liner. The King is shown (in CIRCLE) surrounded by cheering workmen.

BOXING

During this week, Web Frizell will be called upon to defend his right to hold the featherweight championship of Canada and keep Lacombe and Alberta in the spotlight. By reason of his own perseverance and determination to succeed, Web has reached a goal which a good many would like to attain.

Even though handicapped by having no place to train, and with no qualified trainer, Web has kept himself in good shape, and this week he goes to Edmonton with not quite the same advantage as those boys of the cities who have gyms and trainers to coach them. Whatever the outcome Web at least brought honor to Lacombe in 1935 by winning a Dominion title.

The sporting fraternity are all pulling for his success in Edmonton and the boy deserves credit for the obstacles he has overcome.

Web was able to make the Edmonton trip through the kindness of members of the Fire Brigade and the Town Police.

CHRYSLER DELUXE EIGHTS

Chrysler has produced two new long wheelbase models in the Deluxe Eight line, just at a time when there is again a rising demand for large and commodious cars. The new Chrysler Deluxe Eights are a seven-passenger touring sedan and a travel-liner sedan. Both have a 133-inch wheelbase.

The 1936 trend toward longer and lower cars generally permits these large models to bask in a particularly kindly public favor. Chrysler has reduced the height one full inch and moulded new lines that describe a graceful sweep with symmetrical curves from front to rear. The dignified bearing that has always marked Chrysler cars as aristocratic gives them the appearance of being much more expensive than they really are.

Interior comfort and luxury in the bodies stand out as two of the 1936 advances. There is more room both for the shoulders and elbows and over 50 inches leg room from the back cushion to the back of the front seat. Seats placed 14½ inches from the cushion top to the floor are more restful and allow relaxation. Floors are low, only about an inch above the running board. Windows swing outward at the front and rear quarter as part of a scientific ventilation system. Vision is better from both windows and wirewheels. The seven-passenger Touring Sedans differ from the sedan travellers only in that they have two comfortable folding seats.

Built-in trunks that hold the spare wheel and tire as well as several pieces of luggage blend gracefully into the lines of the car.

Safety features are the all-steel bodies, safety glass in all windows and windshield, and a new type of safe vision head lamps that make night driving easier.

SEED CATALOGUES HARBINGER OF SPRING

The approach of Spring and the arrival of new seed catalogues awaken a pleasant anticipation of fulfillment of plans and opportunity for creative effort. Many of our home gardeners will be embarking with enthusiasm on a new enterprise. Some will be motivated by the aesthetic, and others by the utility-value of their undertaking, but all contemplate a goodly measure of pleasure from the time and energy they will devote to their gardens.

The new catalogues as regards the quality are generally superior to those issued for other years. An improvement is first noted in the covers and cover designs. Many of these include the most popular and newest varieties of flowers and vegetables in their natural colors. This is highly commendable, since it not only gives the reader an immediate interest in the contents of the catalogue, but it also is an excellent way of at once calling the prospective customer's attention to the fact that the catalogue represents a seed house that is keeping abreast of the times.

After all, enthusiastic gardeners are always looking for something new for their gardens, and it is in this connection that the word "novelty" is often employed in featuring supposedly new varieties. The word makes a particular appeal to persons who derive pleasure from trying something glamorously described as new and novel. Because it was often found that so-called novelties were not always new in all respects, but rather in name only, protective legislative control of the use and advertising of variety names was included in the Seeds Act en-

acted in 1923. Provisions of this Act now make it necessary that new variety names of vegetables and other economic crops be licensed for use, such a license being granted only when the variety has been found by trial test to be new and distinct from any other known variety. This does not in any way preclude the introduction of a new variety. It does, however, control the use of spurious names and of false and fraudulent advertising and descriptions of re-named varieties.

Lakeside

The members of the Lakeside Community Recreation Club were delighted with the splendid crowd that attended the entertainment and dance in the school March 20 in aid of the piano fund. Everybody reports a good time.

Bert McElroy had the misfortune to have a good horse killed in a runaway last week.

A very enjoyable evening was spent at the home of Mr. and Mrs. Lee, who have recently moved into the district, when about 50 neighbors paid them a surprise visit last week.

A dance will be held in the Lakeside School April 3, sponsored by the Lakeside Community Recreation Club. Hughes' orchestra will furnish the music. A lovely wool cushion, on which tickets are now being sold, will be drawn for, the proceeds to go to the piano fund.

Mr. and Mrs. Fred Walden returned last Friday from an extended visit to Victoria, B.C.

Hints On
Growing Asparagus

Asparagus will grow on a wide variety of soils, but the warm, rich, deep, sandy loams with a clay sub-soil are preferred, as these soils are open and porous, permitting the development of an extensive root system.

Asparagus is a permanent crop, therefore it is advisable to give special attention to the preparation of the soil. Summer-fallowing the land for one season and applying well-rotted manure in the fall is advised. It is important that land to be used for asparagus be free from weeds and grasses.

In prairie areas where winter frosts are severe, spring planting has given more satisfactory results than has fall planting. Plants one year old have produced larger shoots and have produced crops for a longer period than have older ones.

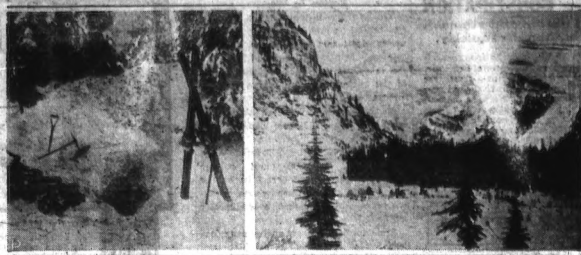

Plant as early in the spring as the soil will permit, the plants being spaced 1½ to 3 feet apart in the row. The crowns may be covered 6 to 7 inches deep in light soils and 4 to 5 inches deep in heavy soils, care being taken to spread the roots out in their natural position. Asparagus is set deeply because the crowns gradually grow upwards as the plants grow older, also it allows manure to be worked into the soil without injury to the crowns.

No shoots are cut until the third season, when only the stronger ones are used. Cutting may begin in earnest the fourth season. With proper care, asparagus will produce satisfactorily for many years. At the Dominion Experimental Station,

Scott, Sask., the varieties Colossal and Argenteuil have been grown successfully in the same plantation for over 15 years.

Late in the fall of each year, the top growth may be cut off and manure applied. This is worked into the soil every spring. The destruction of tops is advised for the purpose of helping to control diseases and insects.

Grizzly Gulch Scene of New Gold Rush

Southwestern Alberta and south-eastern British Columbia are alert this spring as news drifts out of the Grizzly Gulch country of a discovery of gold. In fact, Grizzly Gulch promises to be a new Eldorado as prospectors prepare to pack into the region which lies in the Flathead region of B.C. just across the border from Wall Lake in

Waterloo National Park, Alberta. For a year prospectors have been operating in the region, and while a solid vein of quartz have not been discovered, good-looking samples of gold-bearing quartz have recently been brought from the Gulch. Assays are reported reassuring. Eighty or more claims have been staked and filed at the mines

branch office in Cranbrook, B.C. There is a good trail from Waterloo to Wall Lake and a fair pack trail over the divide and into the Flathead. However, the new-dangled operator who travels by aeroplane will be out of luck, for it is reported there are no landing places in Grizzly Gulch, shown ABOVE, RIGHT. At LEFT is prospector's claim.

Lacombe Station Offers Aid
In Farm Planning

Ever since its institution in 1907, the Dominion Experimental Station, Lacombe, has been gradually extending the field of its activities, in order to be of the greatest possible assistance to the public. In its 29 years of existence this station has conducted thousands of experiments in testing field, forage and horticultural crops, cultural and rotation practices, and methods of feeding and caring for all common classes of livestock.

The vast fund of information secured through these experiments has been disseminated by means of reports, press articles, field days, short courses, direct contact with those who visit the Experimental Station, a wide-spread and heavy correspondence and, for the last two years, weekly news letters to the newspapers throughout the territory served by the station.

Now the Lacombe Station has made another decidedly progressive move to bring about an even greater application of this valuable information, through the institution of one of the greatest services which this station has ever been able to offer to the public. This is a farm planning service which is designed to assist farmers who wish to more methodically co-ordinate their field crops with their other farm requirements. Rotations will be recommended, also suitable grass and legume mixtures, in relation to the number of livestock maintained on the farm, and the climatic and soil conditions.

To secure this free service, write to the Superintendent, Dominion Experimental Station, Lacombe, asking for a questionnaire and blank plan which, when filled out and returned to the station, will give the details necessary for the drafting of recommended changes.

Will King Visit His Alberta Ranch?

King Edward VIII still owns a ranch in Alberta and, according to its manager, Prof. W. L. Carlyle, the new King, who last visited the ranch in 1927 as Prince of Wales, remarked that "even a King needs a holiday." The inference was that King Edward may defy tradition and visit his ranch again. His majesty here shown astride his horse in true cowboy style on one of his visits to "B" ranch.

THE DIGESTIBLE COD LIVER OIL WITH THE PLUS VALUES FOR SALE BY YOUR DRUGGIST

WORLD HAPPENINGS BRIEFLY TOLD

Italy has blocked off the southern tip of Sardinia and the north coast of Cyrenaica in northern Africa, to foreign ships.

Great Britain's great Singapore naval base will be ready for general use in 1936, Kenneth Lindsay, civil lord of the admiralty, announced in the British House of Commons.

Dame Laura Knight, famous British artist, has been elected a Royal Academician, said to be the first woman R.A. since Angelica Kauffman in the 18th century.

Germany officially informed Great Britain she is willing to negotiate a bilateral agreement limiting the size of battleships, cruisers, destroyers, aircraft carriers and submarines.

Lord Tweedsmuir will open the new federal museum at historic Louisburg when he pays an official visit to Cape Breton in July. The museum will house interesting relics of the "Dunkirk of America."

Revenue Minister Ilsey announced in the House of Commons that complete ball and roller bearings, imported for use in traction engines, including farm tractors, would be admitted free in the future.

First appointment to the Senate under the commission of King Edward VIII, Hon. William Duff, former Liberal member of the House of Commons, was sworn in during a brief session of the upper house.

Last year 113 loans were made by the government under the Dominion Housing Act, Finance Minister Dunning told the House of Commons. These loans ranged from \$3,000 to \$10,000.

Remembered Past Kindness

Chinese Boy Repaid Money Provided For His Education

Members of Hailton Road Methodist Church, Heme Hill, England, provided \$30 a year for six years for the advanced education of a brilliant but poor Chinese boy known as Helen-an Yuan. Now a prosperous business man in Shanghai, he has sent a donation to the church. He has changed his name to Mr. Hailton Yuan.

Member Of Health Council

Mrs. T. W. Sutherland of Wells, B.C., has been appointed a member of the Dominion Council of Health, under the Department of Health and National Health Act. It was announced in the Canada Gazette. She succeeds Mrs. Helen Vincent of Saint John and the appointment is effective June 1.

Trouth have been known to live in captivity for more than 20 years.

Here's Real Help In Avoiding Many Miserable Colds

Unique Medication Designed to Aid Nature's Defenses in Nose and Throat, Where Most Colds Start.

PROVED IN USE BY MILLIONS

In the exclusive formula of Vicks Vapo-rinol has been found a unique and successful aid in preventing many colds—winter's threat to our comfort and health.

Va-tro-nol is especially designed for the nose and upper throat—where most colds start. It aids and stimulates the functions provided by Nature—in the nose—to prevent colds, and to throw off head colds in the early stages. Used in time—at the first nasal irritation, sniffle, or sneeze—just a few drops up each nostril—Va-tro-nol helps to avoid many colds.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Va-tro-nol reduces swollen membranes—clears clogging mucus—brings comforting relief.

For Fever and Shorter Colds. Note to mothers—who guard the family's health: Vicks has developed, especially for you, a practical Plan for Better Home Control of Colds. This guide to fever and shorter colds has been clinically tested by practicing physicians and further proved in everyday home use by millions. Full details of Vicks Plan in each Va-tro-nol package.

THE COLDEST FEBRUARY

With an average temperature of 16.5 degrees below zero, the past month of February was the coldest in at least 41 years, since the Dominion weather bureau was established at Edmonton, according to monthly statistics of the bureau. The average temperature for February during the past 41 years was 18.1 above zero.

Playwright: "And you're going to produce my play?"

2141

Conferred Decorations

First Investiture By King Edward Was Brilliant Ceremony

The first investiture of King Edward's reign took place in Buckingham Palace, where he conferred honors and decorations awarded by his father, the late King George V, in the New Year's list, and decorating with the Royal Victorian Order the sailors and soldiers who participated in King George's funeral.

The brilliant ceremony took place in the white and gold Throne Room on the ground floor of the Palace, with the King in the blue and gold full-dress uniform of an Admiral of the Fleet, attended by the Acting Lord Chamberlain, Sir George Crichton, and the great officers of the Royal Household.

Outside the Palace, the guard of honor of Coldstream Guards presented arms and the band played the National Anthem. Crowds saw the officers and men of the Navy and Army march to the Palace to be decorated by the King.

First came a battery of the Royal Horse Artillery who drew the gun carriage at Sandringham; then men of the King's Company Grenadier Guards who acted as bearers, followed by men of the Royal Horse Guards and Life Guards and 800 blue-jackets of the gun-teams who drew the gun carriage in the funeral procession at London and Windsor.

The officers were invested with various degrees of the Victorian Order and the men were decorated with the medal of the same order.

Toll Of Carelessness

Accidents Caused 99,000 Deaths In United States Last Year

Our modern complex life, says the Kitchener, Ont., Record, accompanied by the hustle and bustle that fray men's nerves, is beset with many dangers. Somehow it seems that the tangle of modern life is so complex that untimely deaths are much more numerous than they were years ago because carelessness takes a much greater toll due to present-day conveniences designed to make life less of a drudgery. Therefore it behooves all of us to about with our eyes open if we would avoid the pitfalls that so often bring death or serious injury.

A tragic story emanating from Chicago emphasizes in grim reality the appalling cost of carelessness in this day and age. The National Safety Council states that 99,000 persons died in accidents in the United States last year—one every six minutes. On top of that 365,000 persons were permanently injured and 9,000,000 temporarily disabled.

The total financial damage attributed in one way or another to these accidents reached \$3,000,000,000 in property loss, wage loss and medical expense.

THE HAPPY FARMER

The farmer leads no E Z life, The C D sows will rot; And when at E V vests from strife His bones all A K lot.

In D D has to struggle hard To E K living out; If C F frosts do not retard His crop, there'll B A drouth.

The hired L P has to pay Are awful A Z too; They C K rest when he's away, Nor N E work will do.

Both N Z cannot make to meet, And then for P D King eat Some boarders who so R T eat & E no money makes

Of little U C finds this life; Sick in U C G lies; The debt he C O leaves his wife, And then in P C dies.

—Artemus Ward

Patent Has Expired

Rights To Publish Bible Will Have To Be Renewed

The accession of a new sovereign has once again revived the question of the rights to publish the Bible in Great Britain. The patent of the privileged presses—the king's printers and those of Oxford and Cambridge Universities—expired with the death of the late King George, and a protest against its renewal has been raised by Rev. J. Moffat of the Scottish National Church. Those who defend the existing privilege assert that the question is not merely one of commercial monopoly. History shows, they say, that unless Bible printing is controlled, all sorts of misprints and mistranslations—sometimes intentional—creep in. "Stunt" editions for collectors might be issued. There might even be editions with advertisements.

The Coldest February

With an average temperature of 16.5 degrees below zero, the past month of February was the coldest in at least 41 years, since the Dominion weather bureau was established at Edmonton, according to monthly statistics of the bureau. The average temperature for February during the past 41 years was 18.1 above zero.

Great Lakes Held Millions

Valuable Cargoes Went Down With Many Wrecked Ships

"That's gold in them Great Lakes"—and coal and whisky, too.

The treasure, estimated to be worth more than \$20,000,000, lies in the sunken hulks scattered on the floor of North America's great inland sea. Nobody knows the grand total but in the last 70 years more than 3,000 ships have been lost in the five lakes.

Strung out in a row there would be a wreck every half mile in the 1,100 miles from Buffalo at the foot of the lakes to Duluth at the head. The gold is there but in measure quantity. The real money lies in coal and whisky.

Three of the better known carriers of "freewater" were the Lexington, which vanished with 110 barrels between Cleveland and Port Huron; the Anthony Wayne, which sank in Lake Erie with 300 barrels of whisky and wine, and the Westmoreland, wrecked near Manitowish with a similar cargo. Submerged freighters hold thousands of tons of coal.

Seekers of heavier stuff will find \$50,000 worth of pig zinc in the holds of the Dean Richard; \$20,000 in steel billets in the Fox and \$50,000 in copper in the City of Detroit.

Successful salvage jobs have paid well. The Atlantic, loaded 25 years after it sank, gave up \$30,000; the Erie, brought up 14 years after foundering, had \$180,000 in immigrant savings; and Capt. Harris W. Baker, of Detroit, earned \$500,000 by salvaging the William H. Stevens.

City Of Strange Contrasts

Capital Of French Somaliland Is Of Strategic Importance

Jibuti, the capital of French Somaliland, is a city of strange contrasts. It boasts cinemas, cafes, and a radio station, though its normal white population is less than 700 and in the desert behind it wander tribes not far removed from savagery. Night, when the blistering sun has disappeared, is Jibuti's busy time. At midnight, from 11 to 3, white and black alike shrink into their homes, for the night is slow to a minimum.

The only French port of call on the Suez route to Madagascar, French Indo-China, and other French possessions in the East, Jibuti is of considerable strategic importance to France.

It is the capital, shares command of the entrance to the Red Sea with the British protectorate of Aden, 150 miles opposite on the coast of Arabia.

Jibuti lies on a coast consisting chiefly of granite and volcanic rock with here and there a patch of low scrub. The Gulf of Tadjoura, on which it stands, bites into the coast to a depth of 36 miles. Cliffs of volcanic stone form the shores of this gulf for many miles. Five miles inland from the sea is the lake of Lake Asal, Somaliland's "Little Dead Sea" nearly 500 feet below sea level. Its shores are encrusted with salt deposits, and the gathering of this salt is a major industry.

Testing Perennial Wheat

Perennial wheat is being tested on Dominion Experimental Farms, Hon. J. G. Gardiner, Minister of Agriculture, said in reply to a question in the House of Commons. The experiments were being made from perennial wheat and not grain.

Proportioned By Scale

Gloves are proportioned by a scale based on the fact that in the average man's hand the length of the third finger is the same as the width of the hand, and the length of the hand is the width of the body of the hand to the wrist.

Be ashamed to die until you have achieved some victory for humanity.

2141

Lacy Neckwear For The Making

Fresh, youthful, charming—these lovely lacy collars have truly captured Spring's own spirit! What's more, they'll make one frock look like three. The top one resembling flower petals, is quickly done in petit boucle, or colored string. Crochet collars make the simple with ruffin edge at the upper right. While that lacy bib 'n' tucker is so easy to crochet, a beginner will want to make that one first.

In pattern 5397 you will find complete instructions for making the collars shown, an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

ONLY FRUIT-A-TIVES GAVE LASTING RELIEF FROM CONSTIPATION

Constipation and stomach trouble banished quickly.

After suffering months from constipation, Mr. W. H. Huddleston, Belleville, Ont., was cured by Fruit-A-Tives. He says: "Constipation troubled me severely for months. Nothing did any good until I tried Fruit-A-Tives. They brought me quick and complete relief."

A famous doctor made Fruit-A-Tives by concentrating into convenient tablets extracts of APPLES, ORANGES, FIGS, PRUNES and HERBS. The result is a really natural laxative effective. Fruit-A-Tives bring not just temporary relief, but relief that lasts because of their amazing tonic effect.

FRUIT-A-TIVES

Nature's Fruits and Herbs

Fertilizers In Canada

Use Of Products Small Compared With Other Countries

Fertilizers are manufactured in Canada on a much larger scale than in any other country. Sulphate of ammonia, ammonium phosphate, superphosphate, cyanamide, organics and other fertilizers are all made in different parts of the Dominion in large quantities. The capacity of Canadian plants for the manufacture of these products is much greater than prospective domestic requirements for some time. As the industry is comparatively new in Canada the latest equipment and processes of manufacture are in use, resulting in high quality products.

As Canadian crop production becomes more intensified and diversified more fertilizers will likely be used, but the extent to which these products are used in the Dominion is rather small in comparison with other countries. For example: the annual requirements in Canada only absorb about \$200,000 tons. In the United States 3,750,000 tons are used; 1,500,000 in Great Britain; 3,500,000 in France, and 6,000,000 tons in Germany.

Made A Good Story

Man Thought Up Fine Reason For Shooting Duck

"I receive some strange letters from all parts of the world in connection with my work in bird conservation," said Jack Miner, noted naturalist of Kingsville, Ontario, "but the most amusing of the lot arrived from a police officer in the United States, who apparently is a family friend of mine. The officer because he shot one of my birds out of season."

"The chap appears to have a keen imagination, or else a low opinion of my intelligence, for, after describing to me the whole of the world in the duck's leg, bearing my name, he writes: 'It happened like this. I was pursuing some hi-jackers the other day in the course of my duty and I fired my revolver into the air to make them stop. To my surprise, down came your duck—dead.'"

First In Canada

Television Station Will Shortly Be Erected In Toronto

Early this spring a high-powered radio television station is to be erected in Toronto, the first of its kind in Canada. The announcement is made by the Dominion Peak Television, Limited, a company formed by a group of prominent Toronto business and financial interests as the direct result of successful tests carried out at the experimental station, VEDAK, in Montreal, last year. Constructed to operate on 5,000 watts, the station will provide good reception of programs not only in the city but also throughout an area within a radius of approximately 100 miles.

A total solar eclipse occurs at any one place on the earth on an average of but once in every 3½ centuries.

Has Not Been Explained

No Solution Found For The Mystery Of Sleep

It is strange that with the rapid progress of knowledge no satisfactory solution has been reached of the mystery of sleep. The ancient Greeks were satisfied to say that sleep was brief death, or at least a temporary unconsciousness. But in the time of sleep there is no real unconsciousness. The senses may be dulled, but they are not out of action. The theory of sleep that proceeds on the analogy of drugs is fallacious, since loss of consciousness is not sleep—Belfast Telegraph.

Has Far-Reaching Effect

What happens on land may very often affect fishing in the water. For instance, removing forests and draining swamps tends to increase spring floods and brings about summer droughts in the streams, and both flood conditions and drought conditions may affect fishing.

When going to social functions, Jamaica beller carry their shoes on their heads and don them upon arrival.

To get the reputation for being intelligent try the habit of thinking.

Another Inch To Go

And Youth Will Then Be Tallest Person In World

The world's tallest boy, a shy, bespectacled youth standing slightly under eight feet four inches, has just celebrated his eighteenth birthday. He is within an inch of the height of the tallest man known to medical annals.

Mythology and folklores abound in tales of men of heroic stature, but physicians, ever dubious of the legendary agree that if Robert Wadlow, Alton, Ill., 350-pound college freshman grows to 8 feet 5 inches he will be the tallest man whose measurements have been scientifically verified.

And doctors say that he may exceed 8 feet 6 inches—if his pituitary gland, the tiny, pea-like gland at the base of the brain which controls growth, continues to overfunction.

Robert's closest authentic rival for all-time human altitude record is perhaps the famed "Irish giant," Charles Byrne (O'Brien), who, an authority asserts, was more than 8 feet 4 inches tall when he died in 1783 at the age of 25. Byrne's skeleton is now in the Royal College of Surgeons in London.

Must Have Charmed Life

Man Has Had Many Accidents But Survived Them All

Charles Patrick Thorne must have a charmed life, according to doctors of Sydney, New South Wales. His latest adventure was to fall 15 feet from a tree paralyzing his hands and legs, and after lying several hours unconscious he crawled a mile on his elbows and knees. Doctors said he probably would have died had all his life. Thorne intended to replace the shattered part of his spine with a piece of his shin bone, and he is walking spryly again. Wounded while fighting in France in 1917 Thorne was invalided home, and recovered. Then he fell 32 feet from a roof, and walked again within three months. Ill with acute peritonitis, he was given up by hospital authorities. He recovered. Bitten recently by a poisonous snake he killed the reptile and recovered.

A Nutritious Food

Ice cream has many qualities which commend its extensive use, not only for parties, but for regular family feasting throughout the winter season. Made principally of milk and cream, ice cream is a nutritious, wholesome and easily digestible food. Because of its vitamin content alone, ice cream earns for itself the title of "winter food," since it is a splendid source of the vitamin found to be a safeguard against winter colds.

In addition, the butterfat in ice cream, and the sugar which it contains, provide the heat which the body needs to combat cold. It can be truly said that no other food so deliciously combines food and health value with appetite appeal. In health returns money spent for ice cream is well wisely spent.

WARNING

of Importance to Grain Growers

There is believed to be a certain quantity of "Eastern Grade" Formaldehyde being offered for sale in bulk in this district. It is a grade chiefly used for manufacturing purposes, and its use by Western farmers is not advised.

STANDARD FORMALDEHYDE

100% EFFECTIVE

as recommended for agricultural purposes, particularly for the treatment of smut in grain, is known as the "Western Grade" and is

SPECIALLY PREPARED FOR PRAIRIE FARMERS.

If you purchase your Formaldehyde in bulk, make certain that the words "Specially Prepared for Prairie Farmers" are stencilled in black letters on a white background on the head of the barrel.

LOOK FOR THIS SIGN on the BARREL It is Your Protection

STANDARD REGISTERED FORMALDEHYDE

Specially Prepared for Prairie Farmers to protect and safeguard Western Wheat, Oats and Barley Crops from smut for over twenty years.

Place or blow off the smut balls before treating. Also treat bags and under to prevent reinfection and use the Standard Formaldehyde Measuring Cup for accurate mixing of solution.

STANDARD CHEMICAL CO., LTD. WINNIPEG, MAN.

VIMY PILGRIMS FROM PACIFIC COAST

VANCOUVER, B.C.—To facilitate the transportation of the hundreds of pilgrims who will journey to Vimy next July and witness the unveiling of Canada's war memorial on the battlefields, the steamship companies concerned are requesting definite information on the number of advance bookings early in May, according to officers of the Canadian National Railways.

More than 3000 war veterans and their dependents have made deposits on their passage already. Nearly 3500 of these are from British Columbia.

L. A. BRENNESCHOLTZ'S

AUCTION SALE

Livestock, Implements, Furniture, Etc.

Favored with instructions from the Owner, I will sell, by Public Auction, on the N.E. 30-42-27, 15 miles West and South of Yonoka, 1 mile West and 5 mile North of Wolfville School, 18 miles N.W. of Lacombe, on

MONDAY, MARCH 30

Commencing at 10:00 A.M. Sharp

101—Head of Livestock—101

8 HEAD OF HORSES

Black Mare, 8 years, weight 1250 lbs.; Bay Mare, 7 years, weight 1350 lbs.; Bay Gelding, smooth mouth, weight 1350 lbs.; Brown Gelding, smooth mouth, weight 1200 lbs.; Buckskin Mare, smooth mouth, weight 1200 lbs.; Bay Gelding, smooth mouth, weight 1300 lbs.; Bay Gelding, smooth mouth, weight 1250 lbs.; Shetland Pony (Fats), 11 years.

28 HEAD OF CATTLE

Five Cows, milking; 3 Milk Cows; to freshen soon; 15 Range Cows; 4 Calf, 1 calf, 3 months old.

39 HOGS—Two Grade Tanworth Sows, 6 six-weeks' old Pigs; 2 Grade Tanworth Sows, to farrow in April; 25 Shoats, 100 to 150 lbs.; 1 Tanworth Boar.

28 SHEEP—35 Ewes, to lamb 1st of May; 1 Ram.

POULTRY—35 Barred Rock year old Hens.

IMPLEMENTS

John Deere 8-ft. Binder, Transportation Trucks for same; Cockshutt 18-in. Disc Drill, Deering 7-ft. Tandem Disc, John Deere 3-horse Tractor Plow, 14-in.; Angell One-way Disc Plow, 8 ft.; 7-section Diamond Harrow, Deering Mower, Acme Mower, 2 John Deere Hay Rakes, Hay Buck, 3-in. Adams Wagon, 2 1/2-in. Bain Wagon and Rack, 2-in. Low Wagon and Hay Rack, 4-Wheel Trailer with Pole, 2 1/2-in. Steel Shoe Sleigh, 2-in. Cast Shoe Sleigh with Straw Rack, Pony Cart, Triple Grain Box, Light Bob Sleigh, 12-in. John Deere Heavy Duty Grinder with Belt; 4-Horse Power Cushman Engine with Binder Attachments, 2-Horse Power Massey-Harris Pump Engine (new), Worm Gear Pump Jack, Stock Tank, Tank Heater, small Feed Cutter, 2 large Oil Barrels, 2 small Oil Barrels, Post Drill, Anvil, 50-lb. Leg Vice, Taps and Dies, Blacksmith Tools, set of Steel Blocks, Gasoline Pump, Shovels, Forks, Log Chains, number of Ewers, quantity of Lumber—Birch, 1500 Spruce Shingles, 4000 Oak Bundles, 3000 Green Feed, Stack Hay, 1500 bushels Feed Oats, 350 bushels Feed Wheat; Wood Pile.

HARNESSES—3 Sets of Breaching Harness, 1 Set Hip-Breaching Harness, 1 Set Plow Harness, Stock Saddle and 2 Riding Bridles, 15 Collars, Pony Harness.

FURNITURE

Eight-Tube Victor Mantle Radio, complete with Batteries and Aerial; Extension Table, Desk, 3 Rocking Chairs, Round Oak Heater, Manitoba Couch, Sewing Machine, Child's Rocker, Kiddie Car, Rocking Horse, Table and Chairs, 2 Wagons and many other Toys; 4 Bedsteads, complete; Dressing Table and Chair; Chiffonier, Bedroom Table, 2 Kitchen Tables, 12 Kitchen Chairs, 6-Hole Columbia Range, Maytag Washing Machine, 4-3-3 Gallon Triumph Churn, quantity of Sealers, quantity of Utensils, Dishes, Sausage Grinder, 60-Gallon Galvanized House Tank, 3 Wash Tubs, Copper Boiler, 3 Coal Oil Lamps, 2 Latexins, DeLaval Cream Separator, No. 15; 10-Gal. Cream Can; 2 8-Gal. Cream Cans, 11 Crock.

TERMS: CASH. FREE LUNCH. NO RESERVE.

No goods to be moved until settled for. Bring drinking cups.

Auctioneer JAS. CADEK License No. 6167

L. A. BRENNESCHOLTZ, Owner. G. N. FIELD, Clerk

This being about the last sale of the season, make it a point to be there. Owner is leaving the district, and everything must be sold. You will find the Livestock and Implements in good condition.

PRINCE RUPERT NO-HORSE TOWN

PRINCE RUPERT, B.C.—Prince Rupert is no longer a "no-horse town." In fact this is a "no horse town" since Little doesn't live here any more.

Little was the last equine left in Prince Rupert. She was a familiar figure for years on local streets as Card Party at the home of Mrs. W. C. Little's farm.

However, the years have been creeping up on good old Little, so a few days ago she was placed aboard a train and shipped to Woodcock, where she will spend her declining days doing odd jobs on W. C. Little's farm.

Johnny Walker, Prince Rupert's only horseowner, says he is going out of that kind of business and will have to apply himself to the more up-to-date forms of blacksmithing.

SEEK AMENDMENT TO TOWN AND VILLAGE ACT

Following a talk by D. S. Thompson, the Women's Social Credit Group, at their regular meeting on Thursday, passed two resolutions, the first of which was to seek amendment to the Town and Village Act.

The second resolution, which was to seek amendment to the Town and Village Act, was also passed.

The group is holding a social afternoon and card party at the home of Mrs. W. J. Trotter, the proceeds to be used in assisting with the financing of C. Wilton's trip East.

The April meeting is to be held at the home of Mrs. B. MacMillan, Refreshment committee, Mrs. T. Barker and Mrs. C. S. Davidson.

The amount of branded beef sold in Canada during January, 1936, amounted to 3,660,837 pounds.

AMENDMENT

(Continued From Page One)

the week and despite strong opposition from Mr. Speaker's left and amendments to make it more drastic in its operation, the bill was left unchanged to all practical purposes.

It was defeated by the opposition speakers as "futile" and "a farce."

D. M. Duggan, G. H. Van Allen, L. A. Giroux and J. J. Bowen, with G. O'Connor, by the opposition measure designed to prevent members of the legislature being recalled rather than one to enable constituencies that are dissatisfied with their member having him recalled. The bill now only requires third reading to become law.

A highlight in the discussion on this bill was afforded by H. Inver, Social Credit member from Drumheller, who declared he was sure that every member of the House will resign if the Social Credit promises remain unfulfilled.

Mr. O'Connor said: "That's exactly what I want to know, but I want the Premier to say it." Mr. Aberhart ignored the remark.

An interesting time was spent in the public accounts committee when R. J. May and J. C. Thompson, retiring provincial auditor, gave evidence. Both men stated that anything like repudiation of debts by the province would damage the province's credit very seriously. The faulting would practically close the money markets of the world to Alberta, they both agreed.

During Mr. Thompson's examination by members of the committee he was asked if in all his 12 years' experience as auditor he had found any dishonesty in any cabinet minister or deputy minister. D. M. Duggan asked the question. Mr. Thompson's answer was an emphatic "No."

He said further that Alberta had every reason to be proud of the honesty of its civil service. He told the committee the Alberta civil service compared favorably with any other body of its kind in the Dominion.

Two important bills are still to come before the House before the session ends: the education bill of the Premier, and a new act announced as coming up this week, a bill to provide for compulsory refunding of the province's debt of more than \$160,000,000.

Giving evidence on this before the public accounts committee, J. C. Thompson said it was his opinion that such a measure would "weaken the credit of the province."

He also supported R. J. Major, special financial adviser, in the opinion that participation in the Ottawa proposed loan council would be the best way of refunding the province's debt.

A bill to provide a minimum wage for men was also promised by Hon. E. C. Manning and has received first reading. On Tuesday, 15 bills were approved and advanced to third reading by the House. Among these bills ready for enactment is Mr. Manning's bill requiring certificates of proficiency for certain tradesmen, which Mr. Van Allen said was "pure Fascism."

Another cable has been sent to Major C. H. Douglas and the door is still left open for him to come to Alberta and advise the government, but at the time of writing the status of the negotiations has not been made public.

Night sessions begin in the legislature this week in an effort to get the business cleaned up before Friday.

SHERIFF'S SALE

Bargain Fares To Pacific Coast Easter Week-End

WINNIPEG, Mar. 25. — Bargain fare excursions from the prairie provinces to the Pacific Coast, good from April 3 to 11, taking in the Easter week-end, are announced by J. B. Parker, secretary of the Canadian Passenger Association, on behalf of the Canadian Pacific and Canadian National Railways. Fares for this Spring trip westward will be a cent a mile in coaches, a cent and a quarter in tourist cars and a cent and a half standard from Port Arthur to British Columbia points, with return limit of 21 days in addition to the date of sale.

Similar fares are offered from British Columbia to destinations in the prairie provinces east to Port Arthur.

Stopover privileges will be granted at Banff, Jasper, Nelson or west on westbound tickets sold from Alberta to Port Arthur, and at Banff and Jasper only on eastbound tickets sold in British Columbia. East-bound fares are good from April 4 to 11 inclusive.

Tickets will be good going and returning via the same line and route in each direction and will not admit of optional routes or side trips.

With Easter falling on Sunday, April 12, these excursions bring a welcome break after the long winter.

CREAMERY BUTTER

Production of creamery butter in Canada for the month of January, 1936, totalled 9,388,000 pounds, an increase of 17.4 per cent, or 1,389,949 pounds, compared with January of 1935.

EDWARDSBURG

CROWN BRAND

CORN SYRUP

Featured THIS WEEK BY YOUR GROCER

A PROVEN SOURCE OF ENERGY AND HEALTH!

EDWARDSBURG "CROWN BRAND" CORN SYRUP

is a delicious table Syrup that the whole family will enjoy—and, moreover, it is an energy food that all growing children should eat.

It is highly recommended by famous athletes and coaches and trainers such as T. P. (Tommy) Gorman, Manager Coach of three world-champion hockey teams; "Shag" Shaughnessy, internationally famous football and baseball coach; Albert Pudas, Coach of the 1936 Canadian Olympic Hockey Team, and many other equally prominent athletic authorities.

For infant feeding, "CROWN BRAND" is recommended by Doctors everywhere, and remember, "CROWN BRAND" is very inexpensive and the wholesome sweet you should give the children.

Organist: Miss Alice Inskip.
March 26—5th Sunday in Lent.
10:00 a.m.—Sunday School.
11:00 a.m.—Morning Prayer.
12:30 p.m.—Bible Class.
7:30 p.m.—Evensong.
Special Lenten Service of Intercession every Wednesday at 8 p.m.

LACOMBE BAPTIST CHURCH
Rev. S. J. Waterman, Minister
Sunday, March 29
11:00 a.m.—Sunday School.
7:30 p.m.—Evening worship; subject, "Two Spirit-filled Men." We invite you to worship with us.

ST. ANDREW'S UNITED CHURCH
Rev. R. B. Layton, B.A., R.D., Minister
Services at 11:00 a.m. and 7:30 p.m.
Sunday School at 11:00 a.m.

The Romance of Youth series will be continued on Sunday night. Subject, "The Immigrant Girl That Married the Rich Farmer." The W.M.S. will hold a Tea at the home of Mrs. Sweet on Saturday afternoon.
It has been suggested that March 29 be a "Go To Church Sunday." If the citizens of Lacombe feel in with this idea, there would be no vacant seats in any of the churches.

Bentley

BENTLEY—Mr. Ed Hansen, Mr. and Mrs. Jim Hansen and Miss Clara Hugg motored to Edmonton on Friday last.
Mrs. Harold Hopkins was hostess to the Ladies' Hospital Auxiliary on Thursday afternoon last. Owing to there being so much flu, the attendance was not as large as usual. Following business, the hostess served lunch.

Mrs. W. Holmes was hostess to the Ladies' Aid of the U.C. Thursday afternoon, March 12. Plans were made for the holding of a tea and apron sale at the club rooms in the near future; also plans were discussed regarding the sponsoring of an Amateur Night. Invitations were sent out and it is hoped the response will be enough to make a first-class entertainment. The hostess served lunch.

The prevalence of flu has cut the attendance at the schools badly for the past two or three weeks.
Rev. Mr. McLennan is slowly recovering from his siege of illness.
Mr. Trimble has been on the sick list the past week.

A heavy fall of snow on Saturday last placed the roads in bad condition. It will be some time before the farmers can get on the land, even with good weather.

The Red Deer Health Unit staff were at the Bentley schools recently, giving inoculations to prevent scarlet fever.
Born at Bentley, Thursday, March 19, to Mr. and Mrs. E. M. Palmer (nee Lillian Morsch), a son.

The World of Fact and Fiction

By "ALP"

Lacombe Public Library has a fine array of the newer books on its shelves. Among them are "The Strange Proposal," for those who like the ultra-modern romances, by Grace Livingston Hall; "The Boom-erang Club," one of those "Find the crime baffled" detective stories, by Agatha Christie; "Bonfire," by Dorothy Canfield; "Green Mantle" and "House of the Four Winds," by John Buchan (Lord Tweedsmuir).

In non-fiction, "To Nova Scotia" by Morris Longjohn, should delight all library patrons who hail from the Maritimes (and others, too); for it is a well illustrated travelogue which has the spray of the Atlantic on every page. "Steel of Empire," by Gibbon, is probably the most comprehensive story of the building of the Canadian Pacific Railway ever written—it begins with the first spike driven and follows the troubles and triumphs of the great enterprise from the Atlantic to the Pacific, with all the details of financing thoroughly explained.

Daily papers remind us that it is just 30 years since Francisco (Pancho) Villa, the Mexican revolutionary, crossed the American border and brought U.S. troops hurrying to chase him back again. Some years ago a young Mexican at Columbus, New Mexico, showed me the road down which Villa and his band came in their crossing—the Atlantic in the desert, with sagebrush and the early scenery. Few of our young people today can recall Villa, yet in his day he was a colorful figure.

"The Tragedy of Sir Henry Thornton," by D'Arcy Marsh, has pleased many readers in the West. It is a fast-moving story of the rise and fall of Sir Henry while in control of the Canadian National Railways. It follows the great railroad from American roads to the task of remodeling a great London district system during the Great War (in which he was very successful), then on to his work of building the Canadian National "4th of July" line.

I was well acquainted with D'Arcy some years ago in Calgary and remember him winning \$50 in a play-writing contest; it was a great day for the young author and spurred him on to efforts which will take him a long way.

Chrysler De Luxe Eight Seven Passenger Sedan

JUDICIAL SALE OF FARM PROPERTY NEAR LACOMBE

PURSUANT to an Order for Sale there will be sold by Public Auction at the Post Office in the Town of Lacombe, Province of Alberta, at two o'clock in the afternoon on Saturday, the 11th day of April, A.D. 1936, the following described property: The North-West Quarter of Section Twenty-six (26) in Township Forty (40), Range Twenty-seven (27), West of the Fourth Meridian, in the Province of Alberta, subject to prior encumbrances registered against the said land, particulars of which will be exhibited at the time of sale, and subject to the reservations contained in the existing Certificate of Title.

The property will be offered for sale subject to an upset price which has been fixed by a Judge, at the sum of \$5100.00, and subject to the taxes due on the said land, a statement of which will be exhibited at the time of sale.

TERMS of sale, 25% cash and the balance within sixty days from the date of sale.

The Vendor is informed that there are upon the said lands the following improvements:
Two-storey frame shingle roof dwelling; 28x38 and 14x24 frame shingle roof Barn, 24x28, with loft; Hen House, 18x30; Log Barn, part frame, 30x50, 14x50 (metal roof); Hay Shed, 12x18; Granary, 20x30, 10x30; Ice House and Store Room, 12x24; Drilled Well, 220 feet deep.

There are about 120 Acres of the said land under cultivation.
All the land is enclosed with a three-strand Barbed Wire Fence in poor state of repair, also about 160 rods of Hog Wire.

The said property is situated 2 1/2 miles from the Town of Lacombe, in the Province of Alberta.

For further particulars and conditions of sale, apply to:

J. S. McCORMICK,
Barrister, Lacombe, Alberta,
Solicitor for the Plaintiff.
DATED at the Town of Lacombe, in the Province of Alberta, this 25th day of March, A.D. 1936.

E. S. HOGG,
Clerk of the Court. a3c

reader obtains a clear view of Sir Henry's limitless optimism and energy, ending in a fall from favor which gives the book its title.

D'Arcy Marsh, the author, is a young Englishman who has roamed all over Canada and is now a real Westerner, for his cheerful disposition and editorial ability have won for him many friends on the Prairies and at the Coast.

I was well acquainted with D'Arcy some years ago in Calgary and remember him winning \$50 in a play-writing contest; it was a great day for the young author and spurred him on to efforts which will take him a long way.
